

Announcing the  
2nd Annual  
San Francisco

# DUELING

**R**each out and strike lightning on your opponent. Images like these, taken at the 2005 Photo Tournament, will be made with a patent-pending photographic system that uses the touch detection of the scoring machine to trigger image capture. Thus, the moment of the touch—even a flick—is captured. As usual, the lightning flash will be provided by a sports strobe system. Flickershutter's new dual-camera system has virtually zero shutter lag, allowing capture during optimum blade buckling—meaning lots of exquisite impact S-curves—from two perspectives. Fine-art, archival prints will be available for purchase from an online vendor.

Event: Elite Men's Foil — C and higher  
A Bay Cup event  
Date: Sunday, Feb. 26, 2006
